

PITTMAN GUARDZ U-SHAPED PALLET RACKING UPRIGHT PROTECTOR

pittman[®]

OVERVIEW

The Pittman Guardz U-Shaped Pallet Racking Upright Protector provides wraparound protection for pallet rack uprights.

This U-shaped protector is constructed from a single piece of 5mm thick steel, folded to shield the front and sides of a single upright. Its wide-body format offers extra coverage, making it ideal for rack ends in high-traffic or loading areas where forklifts frequently turn or approach head-on.

It features a corrosion-resistant galvanised and powder-coated finish, and is designed with four fixing points for secure floor mounting.

FEATURES

- U-shaped folded profile – wraps the front and both sides of a single upright
- Galvanised and powder coated – long-lasting protection against rust and wear
- 5mm thick steel construction – resists contact from trucks and forklifts
- Compact coverage – ideal for racking ends, open bays and high-traffic areas
