*Note:
Natural wood "breathes" i.e. it absorbs humidity and releases it in dry atmospheres. It is therefore normal for cracks to appear in wood. This has no effect whatsoever on its strength and durability.
The rust of Corten steel evolves over time. Therefore, this material will rust sooner or later depending on the humidity and temperature levels.*

The constant improvement and evolution of our products may result in some modifications of the technical specifications and characteristics of the products without prior notice.
