

BLACK BULL PALLET RACK PROTECTORS

Heavy duty protection for warehouse racking

pittman[®]

OVERVIEW

Black Bull Pallet Rack Protectors offer reliable protection for warehouse racking, columns, and corners, helping to prevent damage from forklifts and other equipment. Designed for fixed racking installations where industrial trucks operate (except those guided by rails), they are also ideal for safeguarding machinery, partition systems, and rectangular columns.

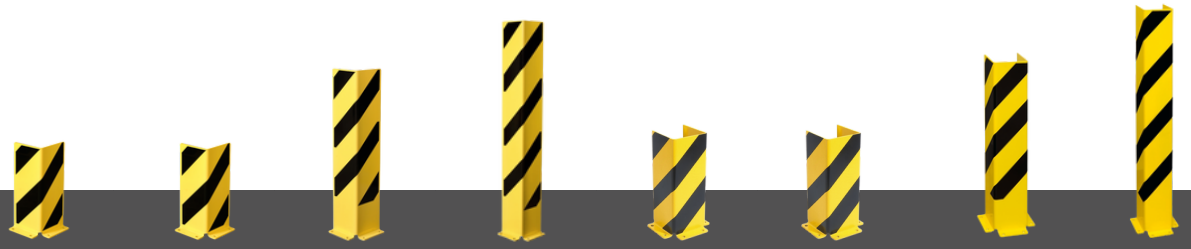

Easy to install, these guards bolt directly to the ground, providing instant protection. Their bright yellow powder-coated finish, with black hazard markings, ensures high visibility in busy workspaces, making them easy for employees to spot.

Available in two designs, the right-angle version protects assets on two sides, while the U-shaped profile offers three-sided protection for more comprehensive coverage.

PRODUCT FEATURES

- Heavy-duty steel - withstands impacts from forklift and work vehicles
- Ultimate safety - conforms to DIN 4844 guidelines to ensure long-lasting safety
- Integral base plates - fast on-site installation
- Powder coated finish - increased visibility in warehouse spaces to enhance safety

Plate thickness:	5mm	6mm	6mm	6mm	5mm	6mm	6mm	6mm
Weight:	8kg	9kg	16kg	22kg	10kg	11kg	20kg	26kg
Required fixings:	4no. 12 x 110mm throughbolt	4no. 12 x 110mm throughbolt	4no. 12 x 110mm throughbolt	4no. 12 x 110mm throughbolt	6no. 12 x 110mm throughbolt	6no. 12 x 110mm throughbolt	6no. 12 x 110mm throughbolt	6no. 12 x 110mm throughbolt

Applications

Heavy duty protection for exposed warehouse racking, columns, beams, or walls.

INSTRUCTIONS FOR USE

- 1. Choose the Installation Surface:** The rack protectors can be securely bolted into concrete using the recommended fixings.
- 2. Mark the Holes:** Place the rack firmly on the ground in the desired position. Use the bollard as a guide to mark the locations for the hardware holes.
- 3. Drill the Holes:** Move the rack protectors aside and drill holes where you marked.
- 4. Install the Rack Protection:** Line up the rack protectors with the drilled holes. Then, bolt it securely into place.
- 5. Ready for Use:** Once installed, the rack protectors are ready to use immediately.
