DB19 PLASTIC DOCK BUMPER

Shock-absorbing protection for loading bays

pittman[®]

OVERVIEW

The DB19 Plastic Dock Bumper is designed to protect exposed loading dock edges from heavy impacts, ensuring long-lasting durability in busy loading areas. Built for strength, it features an integral steel plate for secure, easy installation directly onto docks.

Each bumper consists of a steel frame, two rubber inserts, and a tough ultra-high molecular weight polyethylene (UHMWP) plastic front. The steel frame houses the rubber inserts, absorbing truck impacts, while the flexible plastic front resists damage. To prevent snagging, the bumper has a completely flat front with no fixing holes or crevices, allowing for smooth impact absorption.

PRODUCT FEATURES

- Durable multi-material design – combines steel, rubber, and polyethylene for superior impact protection
- Fast bolt-on installation – steel frame mounts directly to the wall for secure fitting
- Shock-absorbing rubber inserts – reduce impact force from heavy vehicles
- Replaceable components – polyethylene face and rubber inserts can be swapped out if damaged, making it a cost-effective solution

TECHNICAL DATA

SPECIFICATION	DETAILS
SKU	862425
Material	Ultra high molecular weight polyethylene with steel backing
Colour	Plain steel, yellow, and black
Height	465mm
Depth	160mm
Width	280mm
Weight	37.5kg
Applications	Heavy-duty loading bay protection, suitable against most trucks, HGVs and articulated lorries

HEAVY DUTY RUBBER SECTIONS
Excellent impact absorption against most truck and HGV impacts

INSTRUCTIONS FOR USE

- 1. Choose the Installation Surface:** The bumper can be securely bolted onto steel or concrete loading docks
- 2. Mark the Holes:** Place the bumper firmly on the dock in the desired position. Use the bumper as a guide to mark the locations for the fixing holes.
- 3. Drill the Holes:** Move the dock bumper aside and drill holes where you marked.
- 4. Install the Bumper:** Line up the bumper with the drilled holes. Then, bolt it securely into place.
- 5. Ready for Use:** Once installed, the dock bumper is ready to use immediately.
