

HGV HEAVY DUTY WHEEL STOP

pittman[®]

OVERVIEW

The Heavy Duty Wheel Stop provides a strong and reliable solution for managing trucks, buses and large industrial vehicles, helping protect vehicles, buildings and loading areas from accidental damage.

With easy installation on both concrete and asphalt, it offers a practical way to improve parking safety. The integrated cable duct allows cables to be routed neatly underneath, while additional adhesive can be used where extra stability is required.

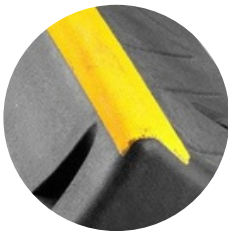

High-visibility yellow markings make the wheel stop easy for drivers to identify, even in low-light conditions. Drainage recesses also help prevent water build-up, making it a low-maintenance solution for truck parking areas, bus depots, logistics centres and industrial sites.

PRODUCT FEATURES

- Heavy-duty design - suitable for trucks, buses and large industrial vehicles
- High visibility - yellow markings help drivers identify the wheel stop in low light
- Integrated cable duct - allows cables to be routed neatly underneath
- Easy installation - fixings included for secure installation on concrete or asphalt

TECHNICAL DATA

SPECIFICATION	DETAILS
Color	Black with yellow reflective marking
Height	150mm
Length	1000mm
Depth	300mm
Applications	Concrete or Asphalt Surfaces

YELLOW REFLECTOR STRIP
Reflector boosts kerbs visibility
