

SEMI DOME 316 STAINLESS STEEL BOLLARD

** Photos are for illustrative purposes only

OVERVIEW

The Semi Dome 316 Stainless Steel Bollard is a premium-quality, high-durability security and safety post designed for both functional and aesthetic applications. Manufactured from Grade 316 stainless steel, it offers superior resistance to corrosion, making it ideal for use in harsh environments, including coastal, urban, and industrial areas.

With a sleek semi-dome top design, the bollard not only enhances modern architectural landscapes but also provides effective protection for pedestrian zones, building perimeters, parking areas, and restricted access points. Its 1700mm height and 102mm diameter ensure a strong visual presence and robust physical barrier, while the polished finish adds a refined look that blends seamlessly into public spaces.

This bollard is low-maintenance, weather-resistant, and built to withstand impact, ensuring long-lasting performance without compromising on style.

FEATURES

- Premium 316 stainless steel – Exceptional corrosion resistance makes it ideal for coastal, urban, and industrial environments.
- Semi-dome top design – Enhances modern architectural settings while providing effective pedestrian and perimeter protection.
- Strong and robust build – At 1700mm high and 102mm diameter, it creates a visible, durable barrier against vehicles.
- Low-maintenance durability – Weather-resistant, impact-resistant, and long-lasting with a polished finish that retains its look.

TECHNICAL DATA

Specifications	Details
Product Code	755879
Height	1700 mm
Diameter	102 mm
Material	316 Stainless Steel
Finish	Polished Stainless Steel
Mounting	Sub Surface
