STRAIGHT WHEEL GUIDES PAIR

Heavy-duty truck parking aids for safer loading bays

pittman[®]

OVERVIEW

The Straight Wheel Guides are a reliable safety solution for loading bays with frequent HGV and truck activity. Designed to reduce the risk of collisions, they help drivers align their vehicles properly when reversing for loading or unloading.

Highly visible and built to last, these guides create clear lanes for trucks, ensuring trailers are positioned correctly at the dock. Made from galvanised steel with a protective powder-coated finish, they are resistant to corrosion and can withstand repeated impacts from heavy vehicles.

Each wheel guide features sturdy base plates at both ends, with four pre-drilled holes for secure ground installation. With a 5mm steel thickness, they provide long-term durability in high-traffic areas.

PRODUCT FEATURES

- High-visibility powder coating – enhances safety and awareness in loading bays
- Heavy-duty – built for long-lasting durability in demanding environments
- Suitable for HGVs – provides reliable protection for various vehicle types
- Easy installation – secures directly to the ground

TECHNICAL DATA

SPECIFICATION	DETAILS
SKU	862593
Material	Galvanised steel
Colour	Yellow
Length	2085mm
Height	250mm
Depth	365mm
Diameter	165mm
Weight	100kg per pair
Required fixings	16no. M16 x 125mm throughbolt anchors

Applications

Heavy duty parking aid and impact protection, suitable for most loading bays and docks

HEAVY-DUTY HARDWARE

Ensures the wheel guide is safely fixed to concrete - order separately

INSTRUCTIONS FOR USE

- 1. Choose the Installation Surface:** The wheel guide can be securely bolted into concrete, using the required fixings.
- 2. Mark the Holes:** Place the wheel guides firmly on the ground in the desired position. Use the wheel guides as a guide to mark the locations for the fixing holes.
- 3. Drill the Holes:** Move the wheel guide aside and drill holes where you marked.
- 4. Install the Wheel Guides:** Line up the wheel guide with the drilled holes. Then, bolt it securely into place.
- 5. Ready for Use:** Once installed, the wheel guides are ready to use immediately.
