Wall Mounted Belt

The ideal solution for controlling access at fixed or temporary locations.

Two mounting methods:

- For screw fixing to walls, pillars etc.
- Magnetic for steel surfaces such as racking, steel cabinets etc.

The self-tensioning belts are quickly and easily deployed, the free end being simply located in the wall clip supplied or to an adjacent wall cartridge. A smooth and controlled retraction is ensured due to the centrifugal braking system.

A useful accessory is our belt link for joining two belts for gaps up to 8m.

See accessories on page 88.
