# ULTRA PORTABLE BARRIER

Portable Protection, Wherever You Need It

**pittman**<sup>®</sup>

## OVERVIEW

The Ultra Portable Expandable Barrier is a versatile and lightweight solution designed for quick setup in a variety of situations.

Ideal for temporary construction, equipment maintenance, and emergency scenes, this barrier is easily portable and can be adjusted to the desired length up to 2.2 metres.

The legs feature easy-to-fill compartments, allowing you to add up to 2.75 gallons of water, increasing the barriers weight and stability during use.

The high-visibility reflective strips makes this barrier a reliable choice for safety in both indoor and outdoor settings.

## PRODUCT FEATURES

- Adjustable width: expands up to 2.2 metres to cover large distances
- Compact and lightweight: portable and easy to deploy, making it ideal for a quick setup
- Reflective strips - easily seen in all lighting conditions
- Fillable compartments - add up to 10 litres of water to boost weight and stability
- Built-in handles - easy to carry and transport for quick deployment
